## **MKS Instruments Announces Live Webcast of Upcoming Investor and Analyst Day**

ANDOVER, Mass., May 20, 2015 (GLOBE NEWSWIRE) -- MKS Instruments, Inc. (Nasdaq:MKSI), a global provider of technologies that enable advanced processes and improve productivity, announced today that it will webcast live its Investor and Analyst Day, taking place in New York City on Wednesday, June 3, 2015 from 9:00 a.m. until 11:30 a.m. EDT.

MKS Instruments' program will include updates on the company's key strategic initiatives, technology inflection points underway that benefit MKS, driving growth in additional advanced markets, differentiated products and market growth opportunities, improvements to the financial model and strategies for capital deployment.

The company's agenda includes a keynote speaker from a leading device manufacturer - providing a broader perspective as to the changing landscape, technology and process changes, and the challenges and opportunities for next-generation device manufacturing. Participants will include:

Keynote Speaker: Dr. Jang-Gyoo Yang, Vice President, Samsung Semiconductor

Gerald G. Colella, Chief Executive Officer and President

Seth H. Bagshaw, Vice President, Chief Financial Officer and Treasurer

John R. Abrams, Senior Vice President, Global Sales and Service

John T.C. Lee, Senior Vice President, Business Units

Paul M. Eyerman, Vice President and General Manager, ENI Products

Wayne R. Cole, Vice President and General Manager, FMC and Valves

The live webcast will be available on the investor page of the company's website and will be archived for a limited time.

### **About MKS Instruments**

MKS Instruments, Inc. is a global provider of instruments, subsystems and process control solutions that measure, control, power, monitor and analyze critical parameters of advanced manufacturing processes to improve process performance and productivity. Our products are derived from our core competencies in pressure measurement and control, materials delivery, gas composition analysis, control and information technology, power and reactive gas generation, and vacuum technology. Our primary served markets are manufacturers of capital equipment for semiconductor devices, and for other thin film applications including flat panel displays, solar cells, light emitting diodes, data storage media, and other advanced coatings. We also leverage our technology in other markets with advanced manufacturing applications including medical equipment, pharmaceutical manufacturing, energy generation, and environmental monitoring.
